## Module info

<b>Module name</b>	MultiAccessories Pro
<b>Description</b>	Manage accessories of a product in groups and offer ability to check out the main product and its accessories in just 1 click.
<b>Merchant benefits</b>	<ul style="list-style-type: none"> <li>▪ Offer a bundle of products, therefore increase sales amazingly.</li> <li>▪ Does it sound like combinations? Yes, it seems, but it's totally different. A product and its accessories are separated products; they are not different attributes of the product.</li> <li>▪ Does it also sounds like a packed product? Yes it seems too. But your customers are free to choose one or more or even not choose any accessories to be checked out. It's very flexible.</li> <li>▪ Don't you see any differences in compare to built-in accessory feature? Alright, it's very similar to, but instead of adding accessories, now you can add them in different groups of accessories. This is good suggestion for your customers in case they don't know what to buy with.</li> <li>▪ And what about related product feature? Accessories are a kind of "related" and more structural.</li> <li>▪ Beyond all of them, shopping has never been easy like this. Just choose accessories and click "Add to basket". All of accessories and the main product now are already in shopping cart!</li> </ul>
<b>Customer benefits</b>	<ul style="list-style-type: none"> <li>▪ Be easy to find out what they should check out</li> <li>▪ Be flexible and has full right to select different accessories (or not) and add to shopping cart so quickly.</li> <li>▪ Save time to get a bundle of their favorite products</li> </ul>
<b>Features</b>	<ul style="list-style-type: none"> <li>▪ Option to show accessory groups in dropdown or checkbox list style</li> <li>▪ Options to show price or image or both with accessories label</li> <li>▪ Manage groups of accessories</li> <li>▪ Activate or deactivate a group</li> <li>▪ Add accessories to different groups of a product</li> <li>▪ Change the name of an accessory - which will be displayed at product page</li> <li>▪ Visitors can select one or some accessories to be added with the</li> </ul>

	<p>main product and proceed to checkout</p> <ul style="list-style-type: none"> <li>▪ Orders then are processed as usual, it sounds like orders of different products</li> <li>▪ ...</li> </ul>
<b>Version</b>	4.1.0
<b>Compatibility</b>	Prestashop 1.5.x, 1.6.x, 1.7.x

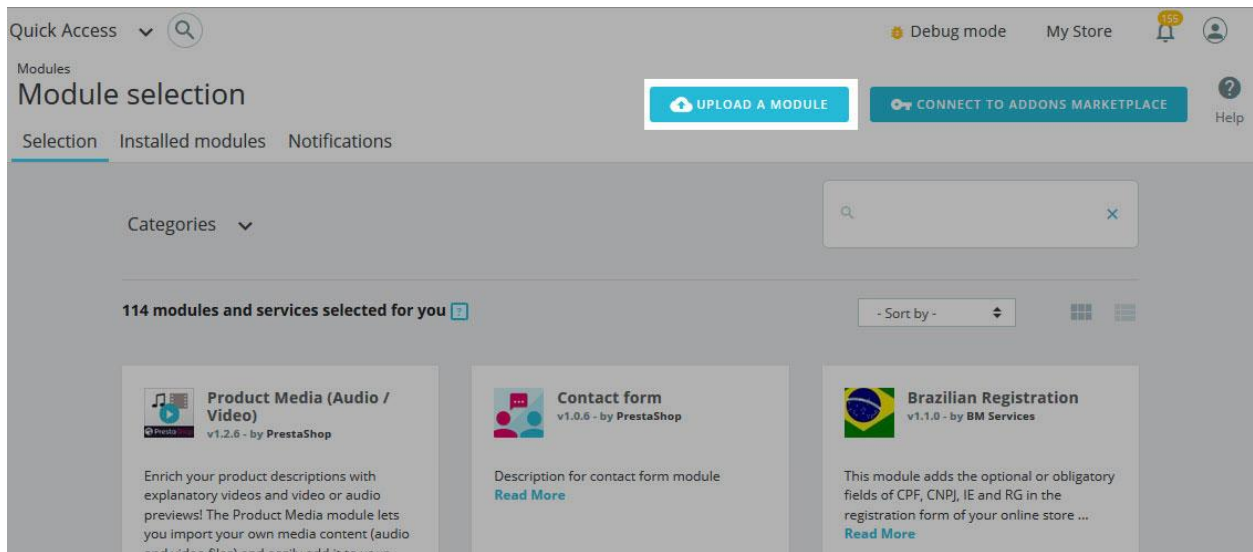

## 1 Install module

- In the Back Office, go to Modules

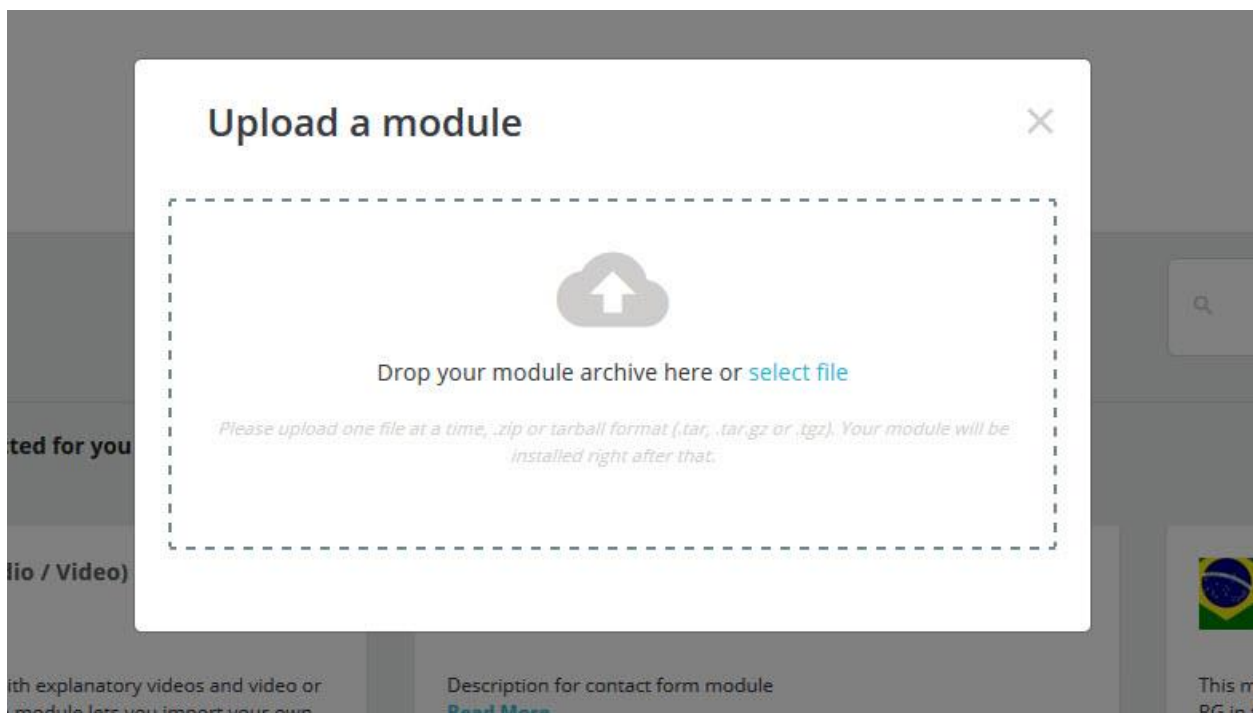

The screenshot shows the PrestaShop Back Office dashboard. The left sidebar contains a menu with the following sections: **Dashboard**, **SELL** (Orders, Catalog, Customers, Customer Service, Stats), **IMPROVE** (Modules, Design, Shipping, Payment, International), and **CONFIGURE** (Shop Parameters, Advanced Parameters). The 'Modules' item under the 'IMPROVE' section is highlighted with a red '1'. The 'Modules & Services' item in the main content area is highlighted with a red '2'. The main content area displays the 'Dashboard' with a 'Quick Access' search bar, a 'Dashboard' title, and a 'Month' filter. Below this is the 'ACTIVITY OVERVIEW' section, which includes a table of 'Active Shopping Carts' in the last 30 minutes. The table has columns for 'Currently Pending' and 'Orders'. The data shows 145 Orders, 0 Return/Exchanges, 0 Abandoned Carts, and 6 Out of Stock Products. To the right of the table is a 'DASHBOARD' section with a 'Sales' box showing '\$6,064.16 tax excl.' and a line graph showing sales over time.

Currently Pending	Orders
	145
	Return/Exchanges 0
	Abandoned Carts 0
	Out of Stock Products 6

- Click on **Upload a module** in the upper right hand side

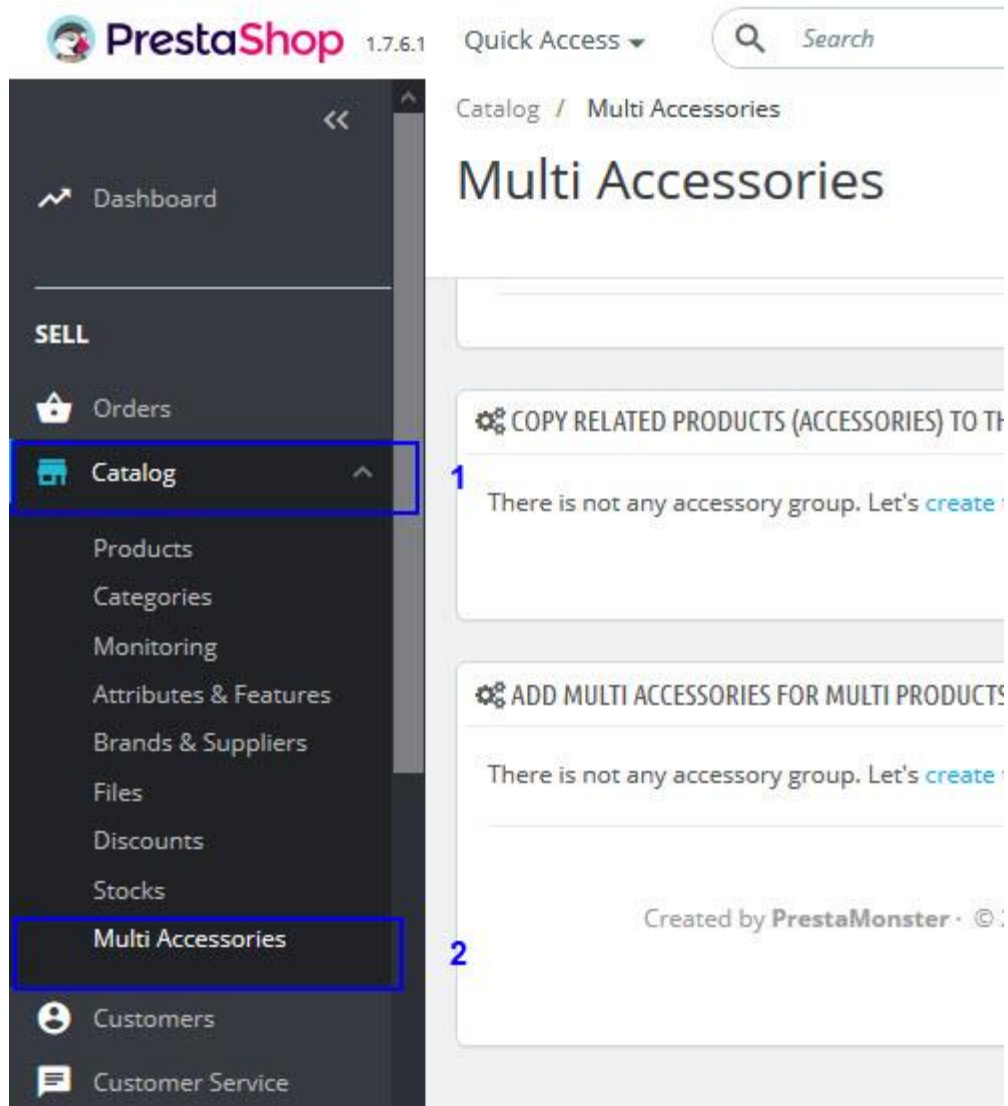

- In Add new module popup, click “**Select file**” button and locate the package downloaded from us.

## 2 How to use

### 2.1 Configuration

Once this module is installed, there will be an extra menu named “**Accessory groups**” right under “**Catalog**” menu. This menu will link you to **Multi Accessories** configuration page as screenshot below:

In this page, you can configure how the accessory content will show on Front-end as well as manage the accessories group.

### 2.1.1 Module settings

The screenshot shows the 'Multi Accessories' settings page in PrestaShop. The left sidebar has a 'SELL' section with 'Catalog' selected, and an 'IMPROVE' section with 'Modules' selected. The main settings area is titled 'SETTINGS' and contains the following items:

- 1. Display style: Dropdown menu (set to 'Checkbox')
- 2. Show images: YES/NO toggle (set to YES)
- 2.1. Apply Fancybox to images: YES/NO toggle (set to YES)
- 2.2. Image size in Fancybox: Dropdown menu (set to 'large\_default (800x800)')
- 3. Show price: YES/NO toggle (set to YES)
- 4. Show price table: YES/NO toggle (set to YES)
- 5. Display combination info in price table: YES/NO toggle (set to YES)
- 6. Change the main item's price accordingly: YES/NO toggle (set to YES)
- 7.1. Show quantity box of accessories: YES/NO toggle (set to YES)
- 7.2. Allow your customers to change item quantity: YES/NO toggle (set to NO)
- 8.1. Buy main product & accessories together: YES/NO toggle (set to YES)
- 8.2. Show total price instead of the main product price at the product list page: YES/NO toggle (set to YES)
- 8.3. Add each accessory to basket: YES/NO toggle (set to YES)
- 9. Delete main product and all accessories when delete main product from basket: YES/NO toggle (set to YES)
- 10. Delete main product and all accessories when delete an accessory from basket: YES/NO toggle (set to YES)
- 11. Display accessories & combinations out of stock at the front end: YES/NO toggle (set to YES)
- 12. Display NoWhere Visibility products at the front end: YES/NO toggle (set to YES)
- 13. Change accessory name when change product name: YES/NO toggle (set to YES)
- 14. Display icon out of stock at the front end: YES/NO toggle (set to YES)
- 15. Alert message: Text input (set to 'You have to select at least 1 accessory in this group')
- 16. Open accessories in a new tab: YES/NO toggle (set to YES)
- 17. Scroll to the table price: YES/NO toggle (set to YES)
- 18. Title: Text input (set to 'Must-have accessories')
- 19. Displayed text when backordering is allowed: Text input (set to 'Must-have accessories')

A 'Save' button is located at the bottom right of the settings area.

In box settings of module page, you can choose to configure:

- **Display style (1):** How list of accessories will be shown. There are 3 types to choose: Checkbox (multi selections) , Radio (single selection) or Dropdown (single selection)

Display type is checkbox. Customer can select multi accessories

Display type is radio box. Customer can select an accessory

Display type is drop-down box. Customer can select an accessory

## 2.2 Add products as accessories

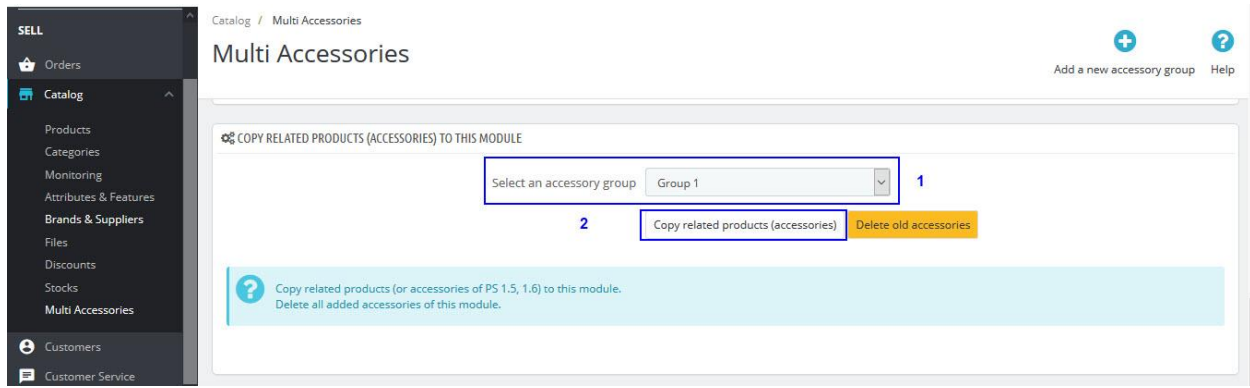

When managing one product, Prestashop already offers a feature to add one or more products as accessories. However, this default feature only shows accessory products in a separated tab.

With “**Multi Accessories**” module you are offered a total new way to manage accessory products just like combinations. You now can:

- Categorize accessory products into different groups.
- Search for products
- Edit the name of accessory product to whatever

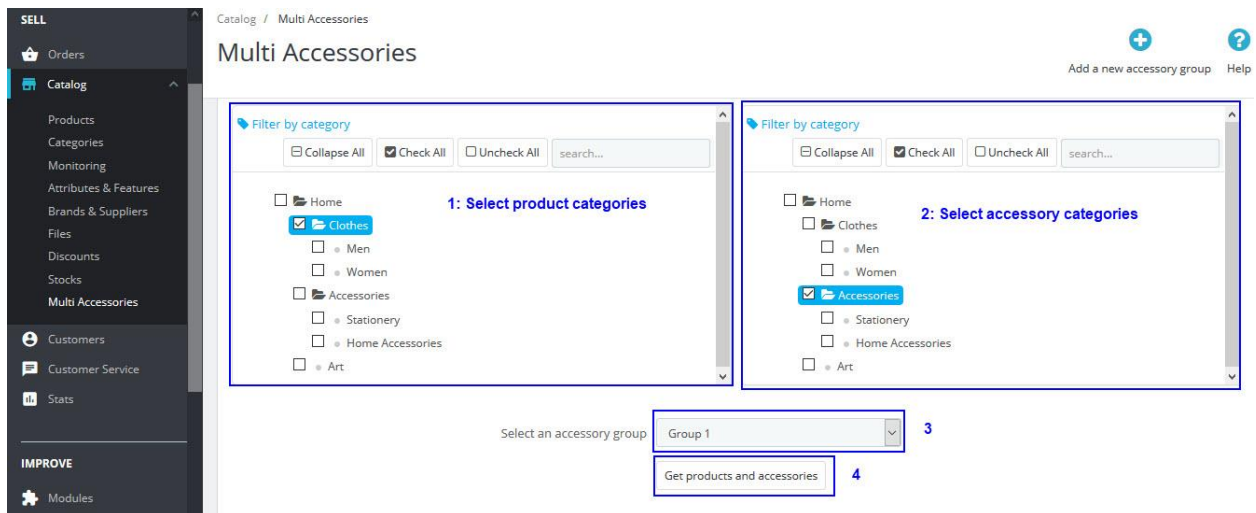

### 2.2.1 Add multi accessories for multi product from module setting page: Catalog >> Multi Accessories.

#### Way 1: Select an accessory group and copy the related products to this module

## **Way 2: Add multi accessories for multi products**

### **Step 1: Filter products & accessories**

### **Step 2: Select multi accessories and assign for multi products**

**1: Select products**

Image	Product name	Price	Select all
	Brown bear - Vector graphics (demo_19)	\$9.00	<input checked="" type="checkbox"/>

**3: Assign selected accessories for selected products**

**2: Select accessories**

Image	Product name	Price	Select
	Brown bear - Vector graphics (demo_19)	\$9.00	<input checked="" type="checkbox"/>
	Brown bear cushion (demo_16)	\$18.90	<input checked="" type="checkbox"/>
	Brown bear notebook (demo_9)	\$12.90	<input checked="" type="checkbox"/>
	Customizable mug (demo_14)	\$13.90	<input checked="" type="checkbox"/>
	Hummingbird - Vector graphics (demo_20)	\$9.00	<input checked="" type="checkbox"/>
	Hummingbird cushion (demo_17)	\$18.90	<input checked="" type="checkbox"/>
	Hummingbird notebook (demo_10)	\$12.90	<input checked="" type="checkbox"/>
	Hummingbird printed sweater (demo_3)	\$28.72	<input checked="" type="checkbox"/>
	Hummingbird printed t-shirt (demo_1)	\$43.12	<input checked="" type="checkbox"/>
	Mountain fox - Vector graphics (demo_18)	\$9.00	<input checked="" type="checkbox"/>

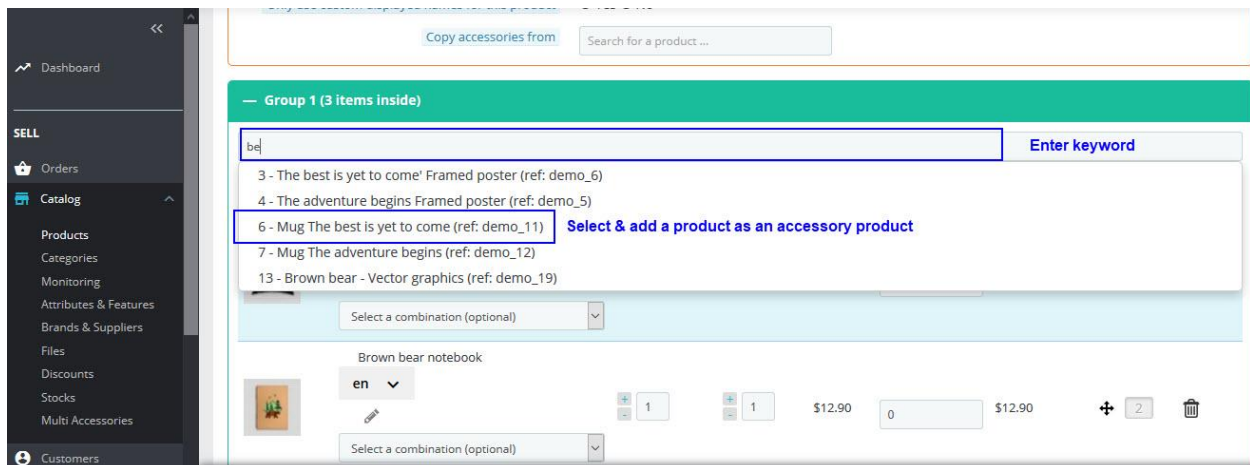

## 2.2.2 Add accessory for a product at the tab Multi Accessories in the product edit page .

### Way 3: Search and add accessory.

To add one product as an accessory product, please follow below steps:

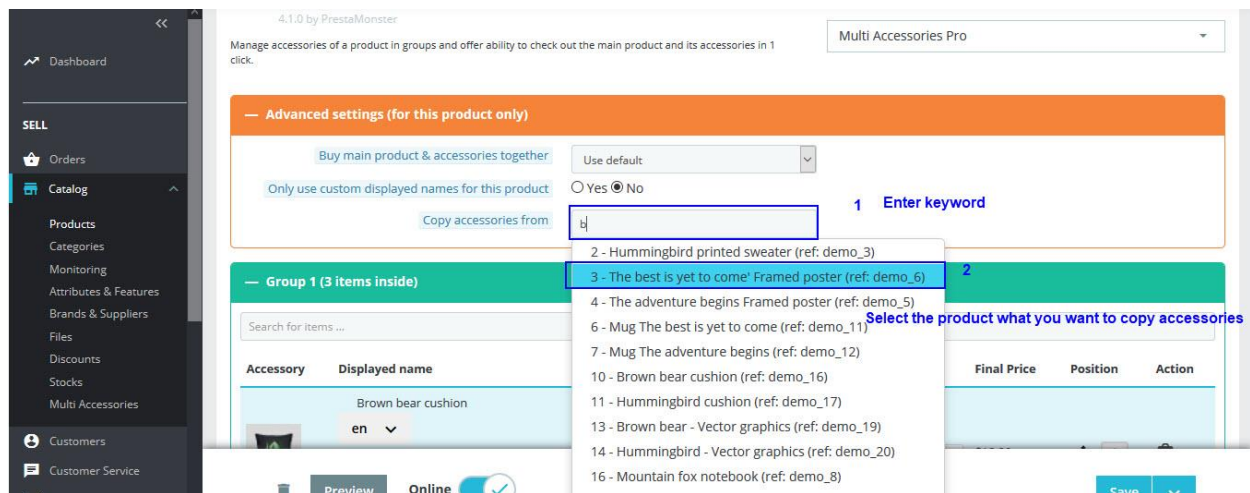

- In product edit page (BO > catalog > product), click on tab “**Multi accessories**”
- For each accessory group, there’s an input field to search product. We can search any products by name or reference. A search suggestion dropdown will be shown based on keyword you entered.
- Select product you want to add as accessory product

After saving, you’ll notice that there’s an icon edit next to every accessory product. This icon is for editing accessory’s label (texts will show at front-end).

## Way 4: Copy accessories from another product.

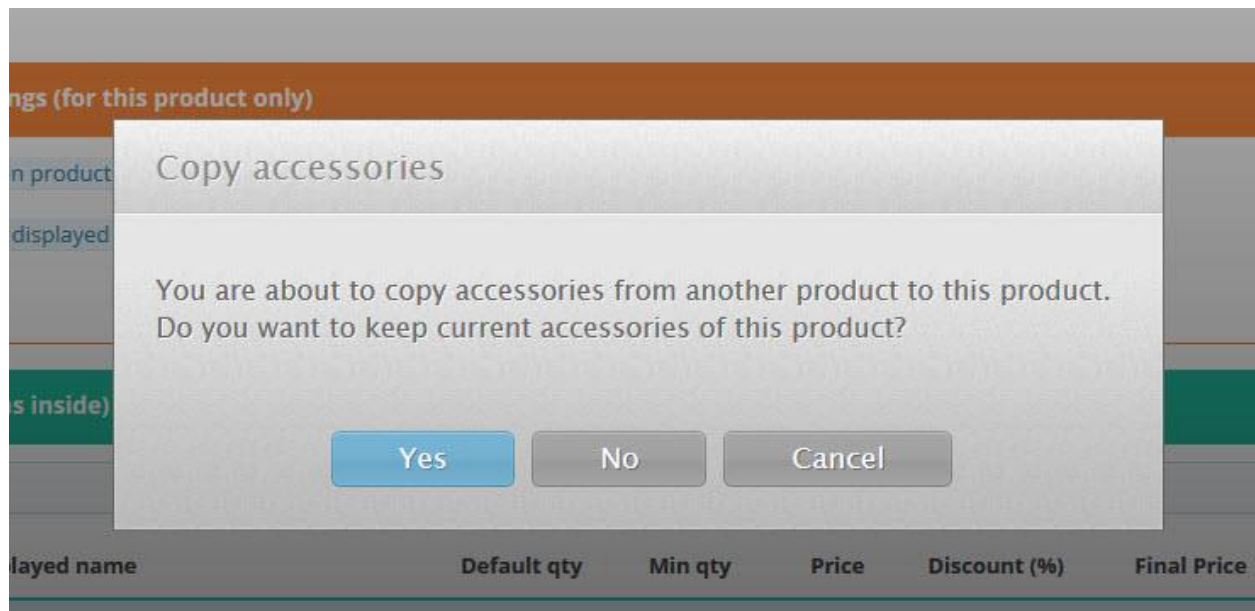

### Step 1: Search & select product

### Step 2:

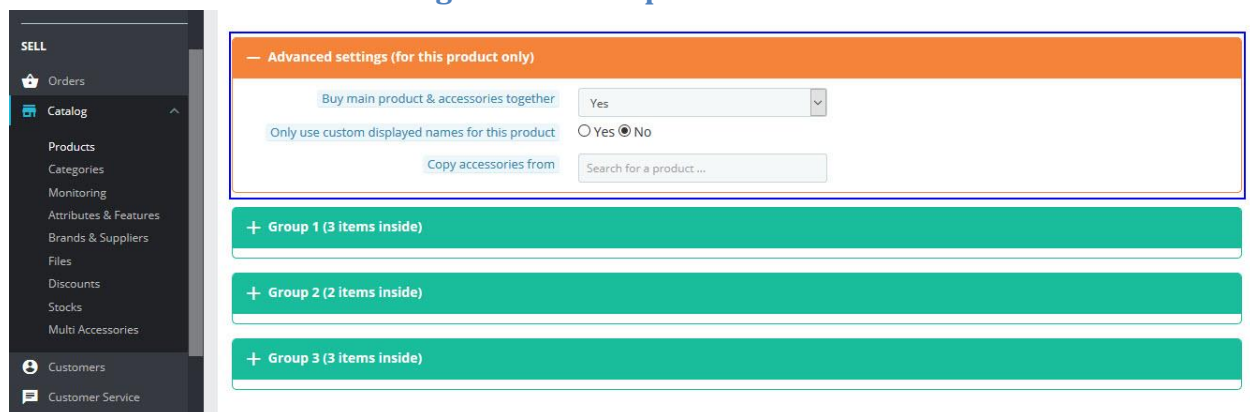

**Yes:** Copy accessories from selected product and keep current accessories of this product.

**No:** Copy accessories from selected product and remove all current accessories of this product.

## 2.3 Manage product setting & accessories

### 2.3.1 This is advanced settings for current product

## 2.3.2 Manage accessories

The screenshot displays the 'Manage accessories' interface. On the left is a sidebar with navigation options: 'Customer service', 'Stats', 'IMPROVE' (with sub-items: Modules, Design, Shipping, Payment, International), and 'CONFIGURE' (with sub-items: Shop Parameters, Advanced Parameters). The main area is titled 'Group 1 (3 items inside)' and contains a table of accessories. The table has columns: Accessory, Displayed name, Default qty, Min qty, Price, Discount (%), Final Price, Position, and Action. Three accessories are listed: 'Brown bear cushion', 'Brown bear notebook', and 'Customizable mug'. Each row has numbered callouts: 1 points to the edit icon in the 'Displayed name' column; 2 points to the 'Select a combination (optional)' dropdown; 3 points to the quantity input fields; 4 points to the discount input field; 5 points to the position increment button; and 6 points to the delete icon in the 'Action' column.

Accessory	Displayed name	Default qty	Min qty	Price	Discount (%)	Final Price	Position	Action
	Brown bear cushion en  1 Select a combination (optional) 2	1 3	1	\$18.90	0 4	\$18.90	+ 1 5	6
	Brown bear notebook en	1	1	\$12.90	0	\$12.90	+ 2	
	Customizable mug en	1	1	\$13.90	0	\$13.90	+ 3	

- 1: Click here to edit accessory name. It only changes name of **accessory in the block accessories**.
- 2: Select combination
- 3: Change default quantity + min quantity
- 4: Add discount for accessory, **it only applies if your customer buy main product & this accessory together**.
- 5: Sort an accessory in this group
- 6: Remove this accessory

## 2.4 Select accessories at frontend

Once being added to accessory groups of the current product, at frontend (product page) these groups (and accessories) look like combinations of the product.

Based on module setting, you will have different layout/style at front-end. You can choose to show your accessories in dropdown lists or in check box lists. Each accessory group will be formed in a list.

You can select one or more accessories to buy with the current product. Actually, when you click on “**Add to basket**” button, you’re checking out one main product (current one) and all its accessories that you chose as separated products. You can easily remove any of them later.

See how different configuration values create different layouts in screenshots below:

## 2.6 Volume discounts are taken into account

Despite of the main items or accessory items, their volume discounts (specific prices) are applied on fly.

The screenshot shows a product page for 'Faded Short Sleeves T-shirt'. The page layout includes a top navigation bar with 'WOMEN', 'DRESSES', and 'T-SHIRTS'. Below this is a breadcrumb trail: 'Women > Tops > T-shirts > Faded Short Sleeves T-shirt'. The main product image shows a woman wearing the t-shirt, shorts, and a straw hat. To the right of the image, the product details are listed: 'Faded Short Sleeves T-shirt', 'Reference: demo\_1', 'Condition: New', and a description: 'Faded short sleeves t-shirt with high neckline. Soft and stretchy material for a comfortable fit. Accessorize with a straw hat and you're ready for summer!'. Below the description, it says '299 Items' and 'In stock'. There are social media sharing buttons for Twitter, Facebook, Google+, and Pinterest. A 'Write a review' button is also present. To the right of the product details, the price is '\$78.42'. Below the price, there is a 'Quantity' selector set to '5', a 'Size' dropdown set to 'S', and a 'Color' selector with two options. There are buttons for 'Add to cart', 'Add to wishlist', and 'Quote this item'. Below these buttons are logos for PayPal, VISA, MasterCard, and SSL. A 'Checkout with PayPal' button is also visible. A red overlay text 'Take volume discounts into account' is placed over the product details and price area. Below the product details, there is a 'Must-have accessories' section with two groups: 'Group 1 Printed Dress - \$27.04' and 'Group 2 Printed Chiffon Dress - \$17.0'. Below this is a 'VOLUME DISCOUNTS' table.

Quantity	Discount	You Save
5	5%	Up to \$4.13
10	10%	Up to \$16.51

Below the volume discounts table is a 'DATA SHEET' button. At the bottom of the page, there are two tabs: 'Compositions' and 'Cotton'.

## 2.7 Display Multi-Accessories block anywhere on product page

Since 2.1.2, we support a custom hook so that you can place this block anywhere in your product page. This is a case study.

On product page, except for left column and right column (if any), the main area is divided into 2 sub columns, left product column and right product column as below.

What if you put the block in other places?

Now, it's easy. Just add (or ask your developer) to add the following code in any place in product page (product.tpl).

`{hook h="displayMultiAccessoriesProduct"}`

```
85         {/block}
86     {/block}
87     {block name='product_prices'}
88         {include file='catalog/_partials/product-prices.tpl'}
89     {/block}
90
91     <div class="product-information">
92         {block name='product_description_short'}
93             <div id="product-description-short-{$product.id}" itemprop="description">
94         {/block}
95
96         {if $product.is_customizable && count($product.customizations.fields)}
97             {block name='product_customization'}
98                 {include file="catalog/_partials/product-customization.tpl" customization=$product.customizations}
99             {/block}
100         {/if}
101         {hook h="displayMultiAccessoriesProduct"}
102     <div class="product-actions">
103         {block name='product_buy'}
104             <form action="{$_urls.pages.cart}" method="post" id="add-to-cart-or-refre
105                 <input type="hidden" name="token" value="{$_static_token}">
